Questionnaire

The purpose of this questionnaire is to establish a platform of data, as comparable as possible, for a region-wide assessment of patterns of child trafficking as well as relevant national, regional and international normative and policy frameworks.

We would ask you to kindly complete the following country-specific questionnaire on child trafficking. Response should be on the basis of information that is **publicly available** in official documents and reports, media, etc. (except for those questions that ask specifically for official statistics). For each comment, please indicate, if possible, the source. At the end of the questionnaire some additional questions will ask for your individual view and perception. These will not be attributed to you personally.

You may wish to complete this Questionnaire in cooperation with relevant Government counterparts or other relevant partners and experts.

Your responses to this Questionnaire, together with other related documents, will contribute centrally to the UNICEF IRC regional study on child trafficking. They will also form a central contribution towards a *Child Trafficking Country Fact Sheet* for your country.

How to fill in this questionnaire:

We would be grateful if you might complete this questionnaire electronically.

Please select YES or NO by ticking the check box accordingly. We further would encourage you to comment on the issues raised in the questions as comprehensively as possible. If you are completing this questionnaire electronically, simply write in the appropriate field highlighted in grey and extra lines will be added automatically.

We are aware that some of the questions are detailed and that some of the information requested might not be available. If that is the case or if you wish to answer a question more extensively and require additional time, please tick the check box "*don't know*" next to that particular question, and let us know.

Definitions of the main terms used in this questionnaire, are given on the next page.

Please send the completed questionnaire to Ms Daja Wenke, Assistant Project Officer, UNICEF Innocenti Research Centre, ideally in electronic form (dwenke@unicef.org) or, if necessary, by fax to +39-055-2033-220. Please contact us if you have any questions.

Thank you very much for taking the time and for your most valuable support and cooperation in this project!

Definitions

Trafficking in human beings

The UN Protocol to Prevent, Suppress and Punish Trafficking in Persons, particularly Women and Children (the Palermo Protocol), supplementary to the United Nations Convention against Transnational Organized Crime, defines trafficking in human beings as follows:

"Trafficking in persons shall mean the recruitment, transportation, transfer, harboring or receipt of persons, by means of the threat or use of force or other forms of coercion, of abduction, of fraud, of deception, of the abuse of power or of a position of vulnerability or of the giving or receiving of payments or benefits to achieve the consent of a person having control over another person, for the purpose of exploitation. Exploitation shall include, at a minimum, the exploitation of the prostitution of others or other forms of sexual exploitation, forced labor or services, slavery or practices similar to slavery, servitude or the removal of organs."

Human trafficking may occur between different countries (cross-border trafficking) or within the same country between regions, between rural and urban areas, etc. (internal trafficking).

Trafficking in Children

The definition of trafficking in children employed in the Palermo Protocol forms the core reference for the purpose of this research:

"Trafficking in children shall mean the recruitment, transportation, transfer, harboring or receipt of a child for the purpose of exploitation. Exploitation shall include, at a minimum, the exploitation of the prostitution of others or other forms of sexual exploitation, forced labor or services, slavery or practices similar to slavery, servitude or the removal of organs."

It is stressed that the trafficking of a child for exploitative purposes, whatever means are used, should be considered a crime.

Child

"Child" means any person under the age of eighteen.

“Legal provisions” vs. social, procedural or other provisions”

Questions on victim assistance in countries of origin and destination will ask for legal, social, procedural or other provisions on very specific aspects of victim assistance.

A first question will ask for “**legal provisions**” by which the legislation explicitly states that a child victim is entitled to a particular aspect of assistance (e.g. a risk assessment prior to repatriation). If you find a relevant provision in the legislation, you will tick the YES box. This will not imply any statement on implementation, however, if you have comments on how this legislation is implemented, please feel free to add them under “comments” to the same question.

Whether or not such legal provisions exist, there may also be other forms of provisions referred to as “**social, procedural, etc.**” providing that a particular aspect of assistance is in place. This may refer e.g. to social service regulations, local or regional practices, procedures established by tradition, implemented by communities or NGOs. As an example, it may be the case that even if there are no legal provisions to guarantee child victims access to education, existing shelters as a general rule may always provide access to education. Such information will be of interest to us.

For some elements of assistance, there can be only legal provisions (e.g. temporary residence). Hence, the questions on other provisions drop out.
